

Central Swimming New Zealand  
Coaching Summit  
13<sup>th</sup> – 15<sup>th</sup> May

**MEMO:** Expression of interest.

- The 2011 CSNZ Coaching summit will be held in Rotorua (KiwiPaka) Friday 13<sup>th</sup> – Sunday 15<sup>th</sup>
- Key presenter will be Bill Sweetenham.
- The Summit is open to all coaches working in the CSNZ Regions divided into two streams.
  - Coaches who have Aquaknight swimmers International – Bronze
  - All squad and club coaches.

Bill Sweetenham needs very little introduction to most swimming coaches. He would have one of the most impressive CVs of any coach in the world. In recent years he is credited with Great Britain's recent successes in world swimming and just in the last month he has been lured back to his home country to work with Australian Swimming again.

Bill is also in demand in the corporate world for motivational presentations and giving advice on establishing pathways and management structures. He is the author of numerous publications on swimming through all levels. We are extremely fortunate to be able to follow on from Ian Turner at the 2010 Summit to Bill Sweetenham in 2011.

CSNZ has over the last 10 years supplied a number of high performance swimmers to the 'national grid' we have shown that we have the coaching expertise, but it is concerning that with exception of a few very good results at the 2011 National Age groups, CNZS is starting to fall behind in building a base of talent in the younger age groups.

This Summit is for all CSNZ coaches to be reinvigorated to learn. The agenda for this summit is going to give you the opportunity to ask for any areas of coaching that you personally want assistance with. Every effort will be given to present all coaches questions either in workshops or forums – it is up to you.

Please complete the registration form on the next page and return by e-mail to [c-power@xtra.co.nz](mailto:c-power@xtra.co.nz) by **Friday 18<sup>th</sup> March**.

*'The CSNZ summit is a no frills Coaching Summit that is designed to give the maximum in quality at a minimum cost. It is designed to deliver what you want'*
